

Save with Neuma Doors

Requirements for the \$500 tax credit*:

- Homeowners can receive 10% of the amount paid for the product as a tax credit, with a maximum credit of \$500.00*. The credit does not include installation costs.
- Doors must meet the requirements based on the ENERGY STAR® Windows Program Version 5.0 performance requirement.
- Doors and windows need ratings equal to or below a U factor of .30 with a Solar Heat Gain Coefficient (SHGC) of .30 or below.
- Neuma Doors are backed by a Limited Lifetime Warranty, exceeding the five (5) year life requirement.

A federal tax credit for certain qualified home energy efficient improvements is in effect for 2011. Homeowners and builders have come to rely on Neuma Doors to provide an elegant solution to reducing home energy costs and qualifying for the \$500* tax credit.

The tax credit in effect for 2011 is an extension of previous tax credits. However, there are important changes to the 2011 tax credit including qualifying criteria, lower credit amounts and lifetime caps including all previous tax credits.

How to qualify for the tax credit:

Purchase and install qualifying Neuma Doors or doors that meet ENERGY STAR® requirements beginning now through December 31, 2011.

Save your sales receipt, a copy of the Neuma Doors Manufacturer's Certification Statement, and product performance (NFRC Ratings/ENERGY STAR Qualification sheet with your tax documents.

Claim the tax credit associated with your qualifying purchase and installation on your Federal filing for the 2011 tax year.

More information about eligibility and the requirements can be found at the ENERGY STAR® website: <http://www.energystar.gov/taxcredits>

There are also many state, local and utility incentives that promote energy efficient choices. To find out what your state has to offer, visit <http://www.dsireusa.org>
